THE SCIENCE MUSEUM CAMERA CLUB was founded in 1939, as an affiliate of the Buffalo Museum of Science, with a focus on nature photography. Since then, members have photographed a variety of subjects: nature, wildlife, landscapes, still life, people, places, and events.

SMCC has a Club membership in Photographic Society of America. PSA is a global community of photographers, people with photographic interests, photo clubs, and organizations. Individual memberships have access to learning opportunities, mentoring, national and international competitions, monthly magazine, and networking with other members around the world. Membership offers benefits for both Individuals, Camera Club and Photographic organizations.

Some SCIENCE MUSEUM CAMERA CLUB members have gone on to become professional photographers, present programs at national conventions, display their photographs in local, national and international exhibitions, publications and competitions. Members also present programs and serve as judges for other camera clubs. Experienced members mentor those new to photography.
